Summary

AI-focused Computer Science undergraduate (CGPA 9.73/10) building toward a career as an AI/ML Engineer. Hands-on experience developing LLM-powered, multi-agent applications using Python, FastAPI, LangGraph, and CrewAI, with a focus on turning research-grade AI concepts into working systems.

Education

B.Tech — Computer Science & Engineering <i>Arya College of Engineering, Jaipur (RTU)</i> Current Semester: 5th • CGPA: 9.73 / 10 (up to 3rd Semester)	Expected 2028
Senior Secondary (12th), CBSE DAV Public School, Bina • 80%	2024
Secondary (10th), CBSE DAV Public School, Karki • 94%	2022

Work Experience

AI Intern — iStudio • Selected through the Internship Common Aptitude Test (iCAT) for a competitive AI internship role • Build and integrate AI-powered application features using Python, FastAPI, and LLM APIs • Contribute to AI model implementation and workflow design through project-based learning	Jun 2026 – Present
Agentic AI Intern — GRRAS Solutions Pvt. Ltd. • Selected for a specialized internship focused on Agentic AI and autonomous multi-agent systems • Design and build multi-agent architectures for intelligent workflow automation using LangGraph and CrewAI • Collaborate with mentors to translate AI concepts into working prototypes	May 2026 – Present
Web Development Intern — Algonive • Developed responsive, interactive web pages using HTML, CSS, and JavaScript • Collaborated with a team to deliver real-world web development tasks on schedule • Improved UI/UX consistency and ensured cross-browser compatibility	Jul 2025 – Aug 2025

Selected Projects

Study Buddy AI — Python, FastAPI, LangGraph • Role: Sole developer — designed and built a multi-agent AI learning assistant for personalized education • Tech used: Python, FastAPI, LangGraph, PDF parsing, persistent memory storage • Outcome: Delivered an assistant integrating a PDF reader, quiz generator, flashcards, study planner, and progress tracking, with persistent memory that personalizes the learning experience
DSA Mentor Agent — Python, LangGraph, CrewAI • Role: Sole developer — built a 21-paradigm dual-agent Socratic tutoring system over a 13-day sprint • Tech used: Python, LangGraph, CrewAI, Gemini 2.5 Flash, Streamlit, Java/Python sandboxing • Outcome: Delivered an autonomous AI mentor that teaches Data Structures and Algorithms through guided hints and questions, with a multi-agent system for explanation, hint generation, and progress tracking

Skills

Technical Skills: Python, C++, SQL, JavaScript, HTML/CSS, FastAPI, REST APIs, Pydantic, LangChain, LangGraph, CrewAI, Prompt Engineering, RAG, LLM APIs (OpenAI, Gemini), SQLite, MongoDB, Git/GitHub
Soft Skills: Analytical Thinking, Problem-Solving, Communication, Teamwork & Collaboration, Time Management, Adaptability

Certifications & Awards

- NPTEL — Programming in Modern C++ (IIT Kharagpur)
- NPTEL — Fundamentals of Object Oriented Programming, Elite Certificate (IIT Roorkee)
- Python Programming Certification — Udemy
