Professional Summary

Mid-level Full Stack Engineer with strong expertise in both front-end and back-end web development. Proficient in **React**, **Next.js**, **Node.js**, and **Python** frameworks, with hands-on experience in system design from low-level details to high-level architecture. Skilled in developing scalable solutions using **REST/GraphQL APIs**, cloud services (AWS/GCP), and database technologies. Adept at optimizing application performance and collaborating in agile teams to deliver robust software solutions.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, Bash

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express, NestJS, FastAPI, Django, REST, GraphQL

Databases: MongoDB, MySQL, PostgreSQL, Redis, DynamoDB

Cloud & DevOps: AWS (EC2, S3, Lambda, API Gateway), Docker, Kubernetes, Terraform, GitHub Actions

Tools & Others: Git, VS Code, Webpack, NPM, Playwright, Agile/Scrum

Concepts: System Design, Microservices, OOP, Networking, Design Patterns, CI/CD

Experience

Airing — Full Stack Engineer

2024 – Present

- Architected and implemented end-to-end e-commerce features using **Next.js**, **React**, and **NestJS**, integrating payment gateways and real-time WebSocket communication.
- Built scalable backend APIs with **FastAPI** and **GraphQL**, handling authentication, CRUD operations, and data synchronization between local and cloud data stores.
- Implemented continuous integration and delivery pipelines using **GitHub Actions** and **Docker**, enabling blue-green deployments for zero-downtime releases.
- Leveraged **AWS S3** and **CloudFront CDN** for efficient media storage and delivery, and optimized frontend performance with code-splitting and server-side rendering.
- Mentored junior developers and collaborated on architecture design, ensuring adherence to industry best practices in system design and code quality.

Softkiwi (Flexmonk.com) — Full Stack Developer

2023 – 2024

- Developed a real estate platform using **React**, **Next.js**, and **FastAPI**, enabling user registrations, property listings, and secure transactions.
- Designed and optimized relational database schemas in **MySQL**, and implemented AWS S3 presigned URL flows for efficient media uploads.
- Containerized the application with **Docker** and set up CI/CD pipelines, achieving automated, repeatable deployments with a red-green strategy.
- Implemented robust authentication and authorization (JWT, role-based access) and integrated third-party services (payment gateway, Twilio messaging).

Car-bon.eco (EcoClean) — Full Stack Engineer

2022 – 2023

- Developed serverless backend services with **AWS Lambda**, **API Gateway**, and **DynamoDB** for processing IoT data and user inputs.
- Automated data ingestion and processing workflows using **Python** and **Boto3**, including scheduled cron jobs and IoT data handling.
- Migrated and managed cloud infrastructure on AWS, configuring IAM roles, S3 buckets, and security policies to meet project requirements.
- Collaborated on front-end features using **React** and **React Native (Expo)**, implementing authentication flows and dynamic data visualizations.

Projects

BwisherNepal.com (E-Commerce Platform)

- Built a modern, scalable online store with separate customer and admin dashboards using **Next.js**, **React**, and **NestJS**, with MongoDB as the primary database.
- Implemented user authentication and stateful shopping cart, including offline cart synchronization using **RxDB** and **Redis**, as well as guest checkout functionality.
- Integrated a payment gateway (Fonepay) via **WebSockets** and backend services, and added marketing features like WhatsApp notifications and a real-time chat system.

- Led the technical team by conducting code reviews, managing tasks in Jira, and optimizing deployment pipelines for blue-green releases. Enhanced site performance with **AWS S3** storage, CDN, SEO optimizations, and **Playwright**-based end-to-end testing.

Flexmonk.com (Real Estate Platform)

- Developed a responsive property listing site using **Next.js**, **React**, and **FastAPI**, enabling user registrations, property submissions, and booking workflows.
- Implemented backend services with **Python** and **MySQL**, handling authentication, role-based access control, and secure data processing.
- Utilized AWS S3 for media uploads with presigned URLs and integrated rich text editing (Quill editor) for content management.
- Containerized the full stack application and implemented continuous deployment pipelines for automated releases.

Smart Waste Management System (Hackathon Project)

- Created an AI-powered platform connecting citizens and municipal teams, allowing users to report garbage locations with images and GPS coordinates.
- Built a dynamic UI with **Django** and Bootstrap, integrated geolocation APIs for real-time mapping, and developed an admin dashboard to track and schedule cleanup tasks.
- Implemented backend services for report management and automated notifications, winning 1st place at a hackathon for this solution.

AutoHireStream AI (Enterprise RAG System)

- Engineered a serverless document query platform on AWS, allowing organizations to perform natural language queries on internal PDFs using Amazon Nova (Bedrock).
- Built Lambda functions (**Python**) to ingest PDFs into S3 and sync with AWS Bedrock Knowledge Bases, and implemented a query endpoint via API Gateway.
- Designed the architecture for vector search and retrieval pipeline, leveraging Amazon Nova Lite for answer generation and ensuring data privacy without hallucinations.

Education

B.Tech in Computer Science & Engineering (Cloud Engineering) — Maharishi Markandeshwar University, Haryana *2022–2026*

Certifications & Achievements

- Oracle Cloud Infrastructure 2025 Certified DevOps Professional
- HackerRank Certified Software Engineer (Skills Certification)
- Linux Foundation LFD102 — Open Source Software Development
- **1st Place** — UPES Dehradun Hackathon 2024 (FastAPI + React, AI waste management)
- **Top 3** — NIET Noida Hackathon 2023
